

TSX-V: ANG
OTCQX: ANGF

Angel Gold Corp. is a Canada-based gold and silver exploration company focus on the exploration of highly prospective mineral properties in Colombia's best mining districts with the highest potential for new discoveries. Angel's flagship project the El Porvenir is located in the Segovia-Remedios gold belt, historically the largest gold producing region in Colombia with 24 million oz produced in the past 150 years, 2 km southeast of the Gran Colombia's Segovia mine, which has to date produced an estimated 5 million oz of gold.

A Proven Team Exploring on a Prolific Belt

Blanca Stella Frias

President, CEO & Director

Key member of Ventana's management team (US\$1.48B buyout of La Bodega)

James Stephenson

VP Exploration

Professional geologist with more than 30 years' experience

Mark Gelmon

CFO

Chartered Accountant with over 20 years of experience

Allen V. Ambrose

Director

Founder and director of Minera Andes (Today's McEwen Mining Inc.)

Jon Lehmann

Director

Founder of Ventana Gold; discoverer and manager of the development of La Bodega team (US\$1.48B buyout of La Bodega)

Paulo Javier Ochoa

Director

Practicing Colombian lawyer with intergovernmental relations experience

Thomas E. Wharton, Jr.

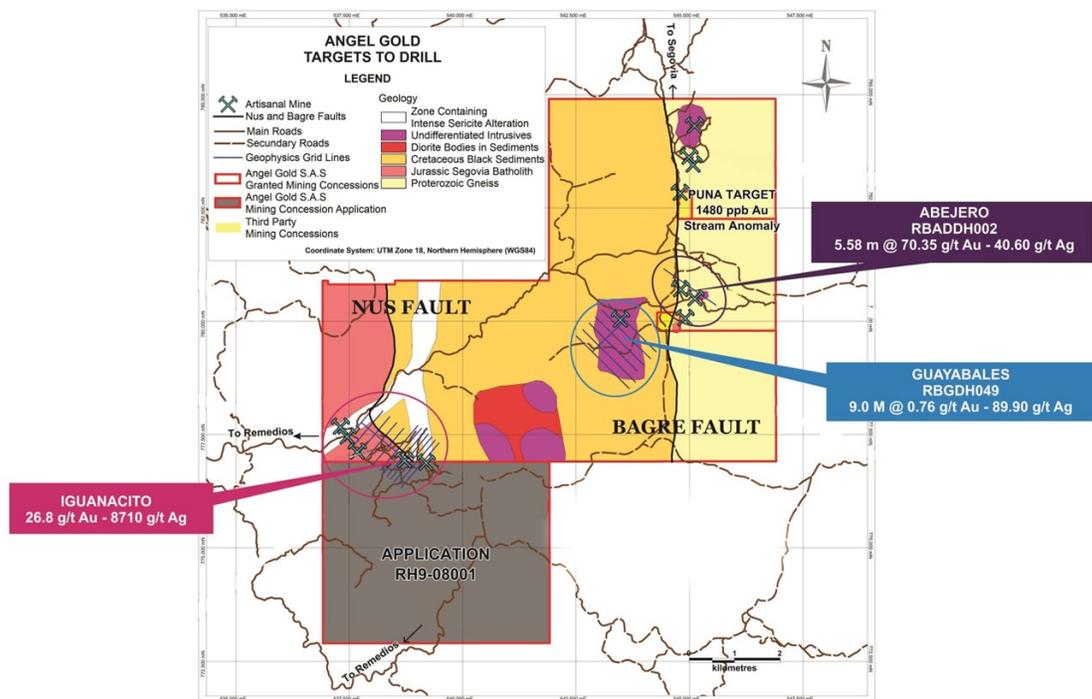

Director

Experienced in start-up, development and financing early stage companies

Investment Highlights

- ❑ Angel's **100% optioned El Porvenir project** comprises **59.45 km²** in the **Segovia Belt**, with a **final stage pending application for 20 Km²**, contiguous to the south. Past production + known reserves + resources of **Segovia Gold Belt amount to ~24Moz Au.**
- ❑ **El Porvenir has 3 drill-ready high-grade gold and gold-silver prospects with depth potential** supported by Induced Polarization and ground magnetics surveys. **Two targets are breccia mineralization within large alteration zones**, more typical of multi-million ounce Cauca Belt **bulk-tonnage mineralization** than traditional narrow vein Segovia Belt style, confirming **potential for intrusive related and porphyry style mineralization.**
 - Iguanacito Prospect:**
 - **Trench samples average 3.27m of 5.37 g/t Au Equivalent over 185m within an alteration zone 50m wide, widening to over 100m on entering the application.**
 - Guayabales Prospect:**
 - **1100 x 400 meter coincident chargeability and resistivity high, magnetic low, and soil silver and gold anomaly.**
 - **Crackle-breccia in an historic drill hole returned 9m of 0.76 g/t Au, 89.9 g/t Ag**
 - Abejero Prospect:**
 - **Historic drilling** and local miners' workings defined two thicker, **higher grade shoots**
 - **Shoot 1, 145 meters strike length, averaged 2.5m of 39.92 g/t Au and 23.22 g/t Ag** in 4 historic drill holes
 - **Shoot 2, averages 1.7m of 9.81 g/t Au and 3.88 g/t Ag** in 3 historic drill holes and an artisanal mine face channel sample
- ❑ **El Porvenir 185km by paved road** northeast from **Medellin, Colombia's second largest city; Segovia 5km northwest** from the project; **Remedios 4.4km west** of the Project. **Low-lying hilly topography** with an **altitude between 250m and 700m. Land access and water permits in place for drilling.**
- ❑ **Angel's team** has multiple **economic discoveries** of more than **50M oz Au** including: Brisas, Venezuela; Isadora Mine, Venezuela; La Bodega, Colombia; Maude Creek, Australia; Zijinshan, China

El Porvenir Project, Three Drill Ready Prospects Environmental Permits Granted

Capital Structure

Issued & Outstanding as of: July 5, 2017

Issued Capital:	52,665,205
Warrants:	7,917,445
Options:	4,889,925
Fully Diluted:	65,472,575
Market Cap (July 5, 2017)	3,949,890
